

James Patrick Partnership Ltd. Fire Rated Column Casings

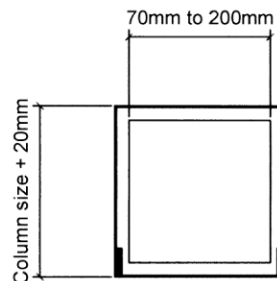

Fire rated column casings are a specialist product used in the fire protection process for square hollow section columns used to support mezzanine floors, used in conjunction with either a suspended ceiling they are robust and quick and easy to fit when compared to the more traditional ways of column fire protection construction.

Manufactured from pre-finished pressed steel they are lined with a one hour minimum fire protection medium such as Promat or Fireline Board.

Column casings are available in a range of finishes from plain galvanised, the most cost effective option, or alternatively a range of BS4800 standard colours.

All column casings are backed with certification from the Warrington Fire Research Centre following extensive testing and can therefore be used with confidence in any application. The casing is delivered fitted with the fire protection medium and there is no danger therefore of incorrect or incomplete installation of the unit.

Range of sizes available to suit from 70mm x 70mm to 200mm x 200mm square hollow section or alternatively 152mm x 152mm or 203mm x 203mm universal column sections.
